**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

# Office Action Summary

**Application No.**

10/511,341

**Applicant(s)**

SASAKI ET AL.

**Examiner**

NANCY VOGEL

**Art Unit**

1636

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 April 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 68-77 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 68-77 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☐ Information Disclosure Statement(s) (PTO/SF/ICE)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

### **DETAILED ACTION**

Claims 68-77 are pending in the case.

Any rejection of record in the previous action not addressed in this office action is withdrawn. There are no new grounds of rejection that were not necessitated by applicants' amendment and therefore, this action is final.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 68-74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Braselmann et al. ( Proc. Natl. Acad. Sci. USA 90:1657-1661, 1993) in view of Miyaji et al. (Cytotechnology, 4(2):173-180, 1990).

This rejection is maintained essentially for the reasons made of record in the previous Office action, mailed 3/17/08, with slight modification necessitated by applicant's amendment to the claims.

Braselmann et al. disclose a mammalian cell comprising a DNA construct for expression of a transcription factor necessary for construction of an inducible expression system, wherein the transcription factor is a chimeric protein of a ligand binding domain of estrogen receptor and yeast Gal4p. Braselmann et al. disclose cells comprising in addition a DNA construction where a reporter gene is ligated at the

downstream area of a promoter having a responsive element of a transcription factor, which is the a Gal4- responsive promoter linked to a reporter gene which is a c-fos gene or a CAT gene (see Fig. 1 and page 1658). The reference teaches that the disclosed expression control system may be used in other tissue culture cells (see page 1657, second column, second complete paragraph). The difference between the reference and the instant claims is that the cell in which the constructs are present is the Namalwa KJM-1 cell which is adapted for serum-free culture.

However, Miyaji et al. disclose Namalwa KJM-1 cells adapted for serum-free culture, and disclose the usefulness of said cells for foreign gene expression (see page 173). It is noted that DNA encoding G $\alpha$  proteins are present in all mammalian, or human, or specifically, a B cell line.

It would have been obvious to one of ordinary skill in the art to have utilized the cells disclosed by Miyaji et al. as the host cell for the expression system disclosed by Braselmann et al., since Miyaji et al. and Braselmann each are concerned with the expression of foreign genes in tissue culture cells of interest. One would have been motivated to do so by the disclose of Braselmann et al. of the usefulness of the disclosed expression system for control of expression of genes in any tissue culture cell of interest, and in view of the usefulness of the KJM-1 Namalwa cells for expression of foreign genes and production of proteins of interest. Based upon the teachings of the cited references, the high skill of one of ordinary skill in the art, and absent evidence to the contrary, there would have been a reasonable expectation of success to result in the claimed invention.

Claims 68-74 and 76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Braselmann et al. . ( Proc. Natl. Acad. Sci. USA 90:1657-1661, 1993) in view of Miyaji et al. (Cytotechnology, 4(2):173-180, 1990), and further in view of Scheirer (US Patent 5,866,342).

Braselmann et al and Miyaji et al. are cited essentially for the reasons set forth above.

The difference between the references and the instant claims is that luciferase is used as the reporter gene.

However, Scheirer discloses lymphoblastoid cells comprising DNA constructs comprising a promoter linked to the luciferase reporter gene (see col. 8). It would have been obvious to one of ordinary skill in the art to have utilized a well known reporter gene such as luciferase gene disclosed by Scheirer in the constructs disclosed by Braselmann and Miyaji et al., since luciferase is known to be a useful reporter gene, and in the absence of unexpected results, the substitution of one reporter gene for another would have been obvious to one of ordinary skill in the art. Based upon the teachings of the cited references, the high skill of one of ordinary skill in the art, and absent evidence to the contrary, there would have been a reasonable expectation of success to result in the claimed invention.

Applicants have argued the rejection should be withdrawn since a DNA construct comprising a DNA encoding a Gα protein or a chimeric Gα protein is included. However, as is noted above, each of the references discloses a mammalian cell, and all

mammalian cells comprise DNA encoding Gα proteins in their genome. Therefore, applicant's arguments are not found convincing.

The following is a new rejection necessitated by applicant's amendments to the claims:

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 68-77 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 68 and by dependence claims 69-77 are vague and indefinite in the recitation of "where at least one of the following (1) and (2) is optionally integrated into the chromosomal DNA..." since it is not clear what the term "optionally" is intended to refer. For instance it is not clear it is intended that the constructs listed in (1) and (2) must be present, but may or may not be present in integrated form, or whether it is optional that the constructs recited in (1) and (2) are present at all. Therefore it cannot be determined what the intended metes and bounds of the claims are.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANCY VOGEL whose telephone number is (571)272-0780. The examiner can normally be reached on 7:00 - 3:30, Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Woitach can be reached on (571) 272-0739. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
